DONATUS EDZEBUBU ANKAH

Full Stack Software Engineer

Highly accomplished Fullstack Software Engineer with a proven track record of designing, developing, and implementing innovative software solutions. Equipped with extensive expertise in front-end and back-end technologies, adeptly bridging the gap between user experience and technical functionality. Proficient in a wide range of programming languages and frameworks, enabling seamless application development. A collaborative team player with excellent communication skills, committed to delivering high-quality code on time and within budget. Continuously staying abreast of industry trends and emerging technologies to drive continuous improvement and elevate software development standards.

PROFESSIONAL EXPERIENCE

- Code Raccoon, Accra** 2025 – Present
Head Full Stack Development
Key responsibilities:
 - Lead and manage fullstack development teams, overseeing both frontend and backend engineers to ensure timely and high-quality delivery of software solutions.
 - Define technical architecture and coding standards for scalable and maintainable applications using modern technologies such as Laravel, Symfony, React, Flutter, Kotlin, and others.
 - Collaborate with cross-functional teams including product managers, designers, and QA engineers to translate business requirements into technical specifications.
 - Oversee the full software development lifecycle – from system design and architecture to deployment, monitoring, and continuous improvement.
 - Drive adoption of best practices in CI/CD, version control, automated testing, and code reviews.
 - Mentor junior and mid-level developers, providing technical guidance, code reviews, and career development support.
- Ho Technical University, HO** 2020 – 2025
ICT Assistant
Assigned to the Directorate of ICT's ERP and Special Projects division.
Key responsibilities:
 - Senior Software Engineer handling all software development
 - Lead Developer at the Directorate of ICT.
 - Lead Core Developer in the development of HTU JMTC Garage management system.
 - Project Manager in the development of HTU Research Fund System.
 - Manage and maintain HTU Market and DeliverIn-Ho app.
 - Manage and maintain all web development and software projects of the Institution.
